

BANUU

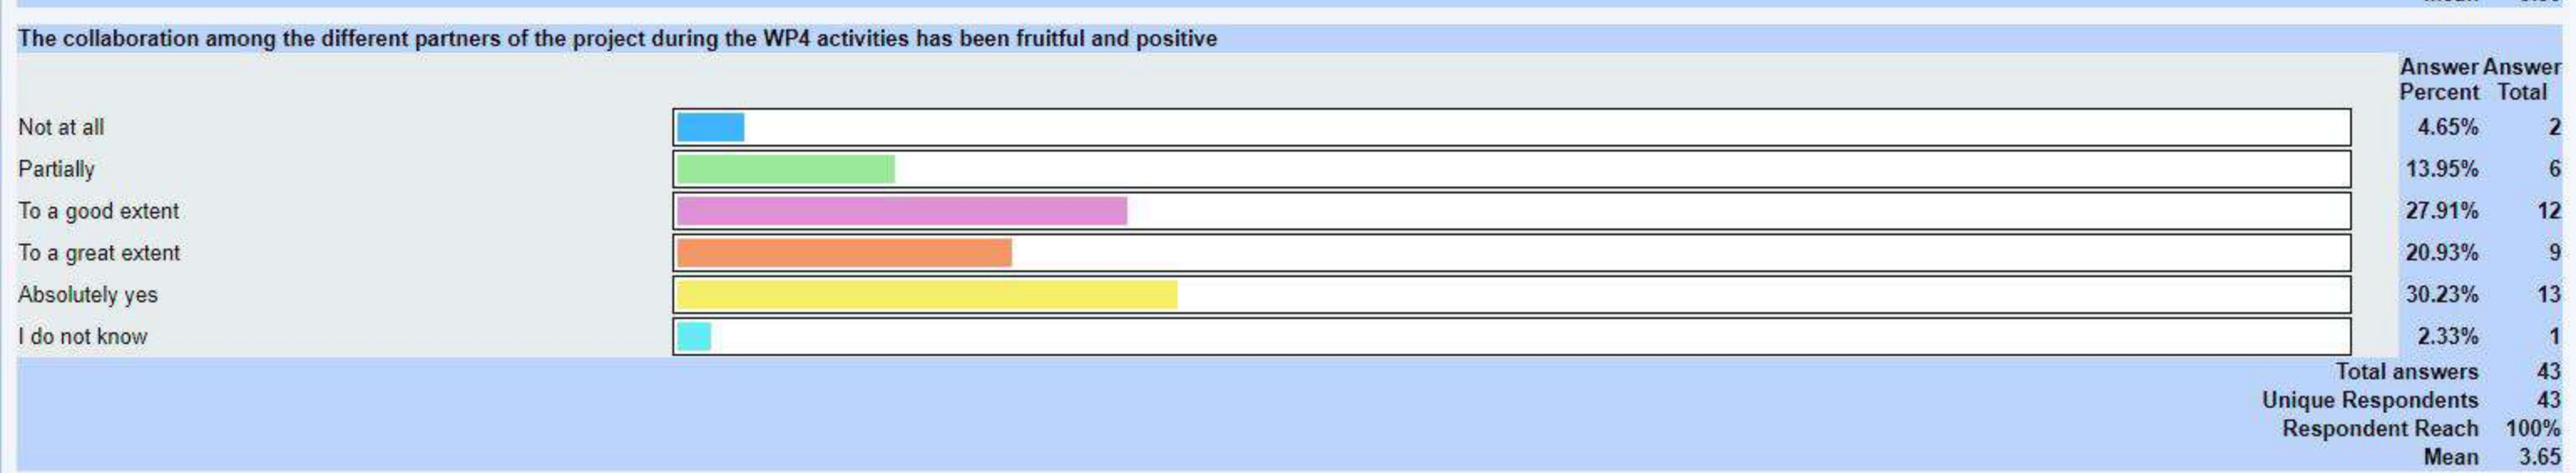

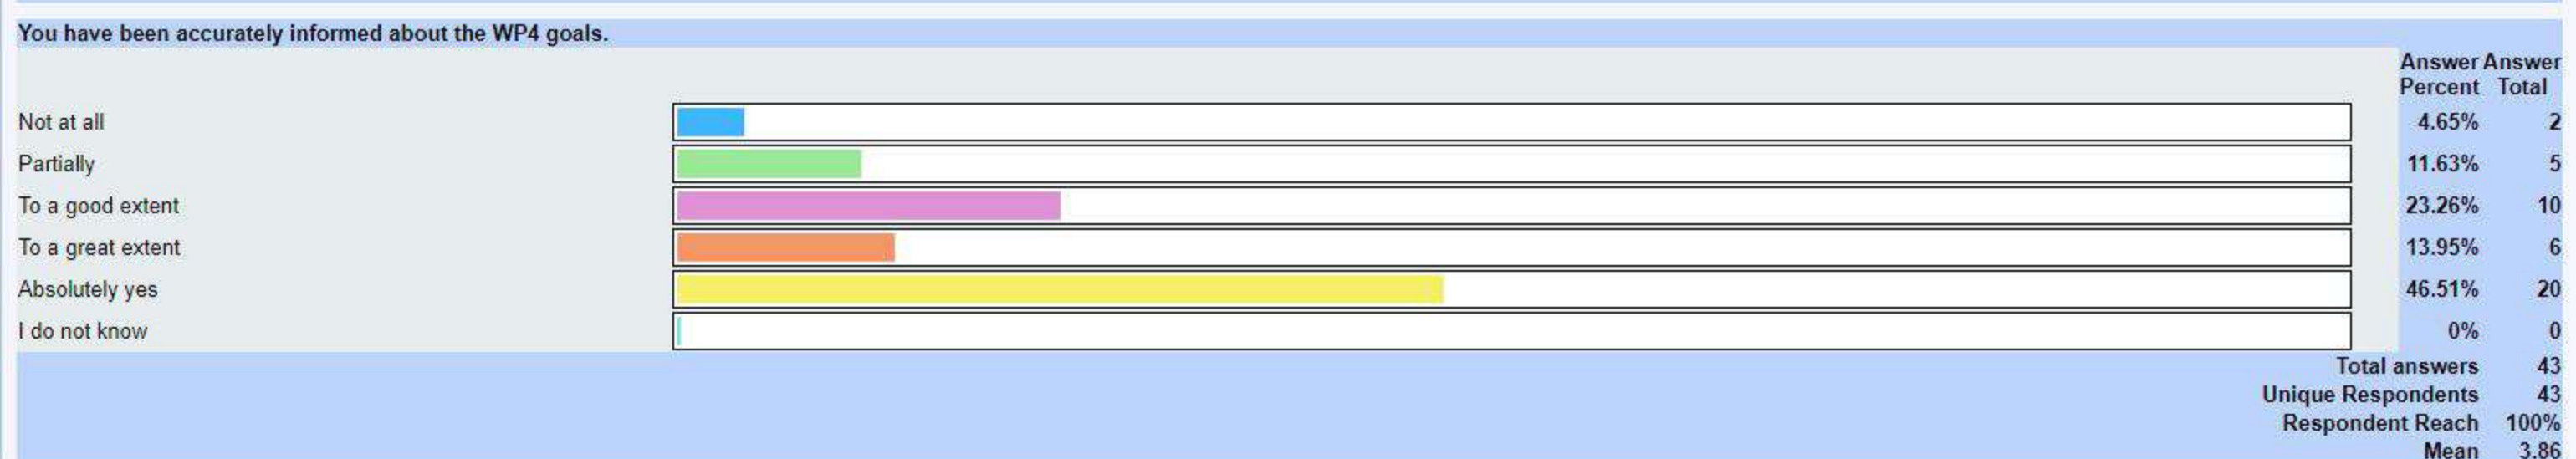

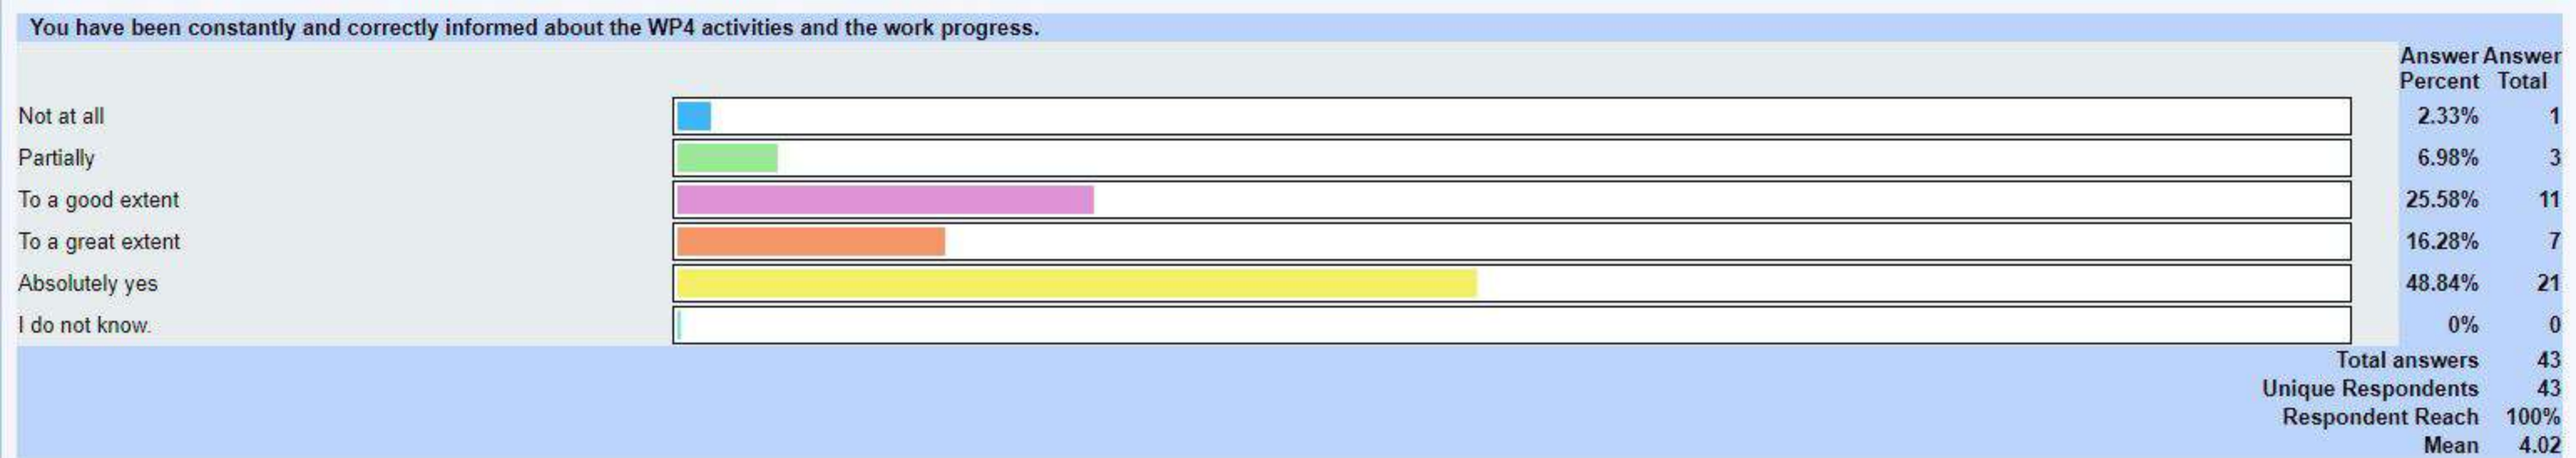

Designing new pathways for employability and entrepreneurship of Iraqi students in Archaeology and Cultural Heritage

Co-funded by the
Erasmus+ Programme
of the European Union

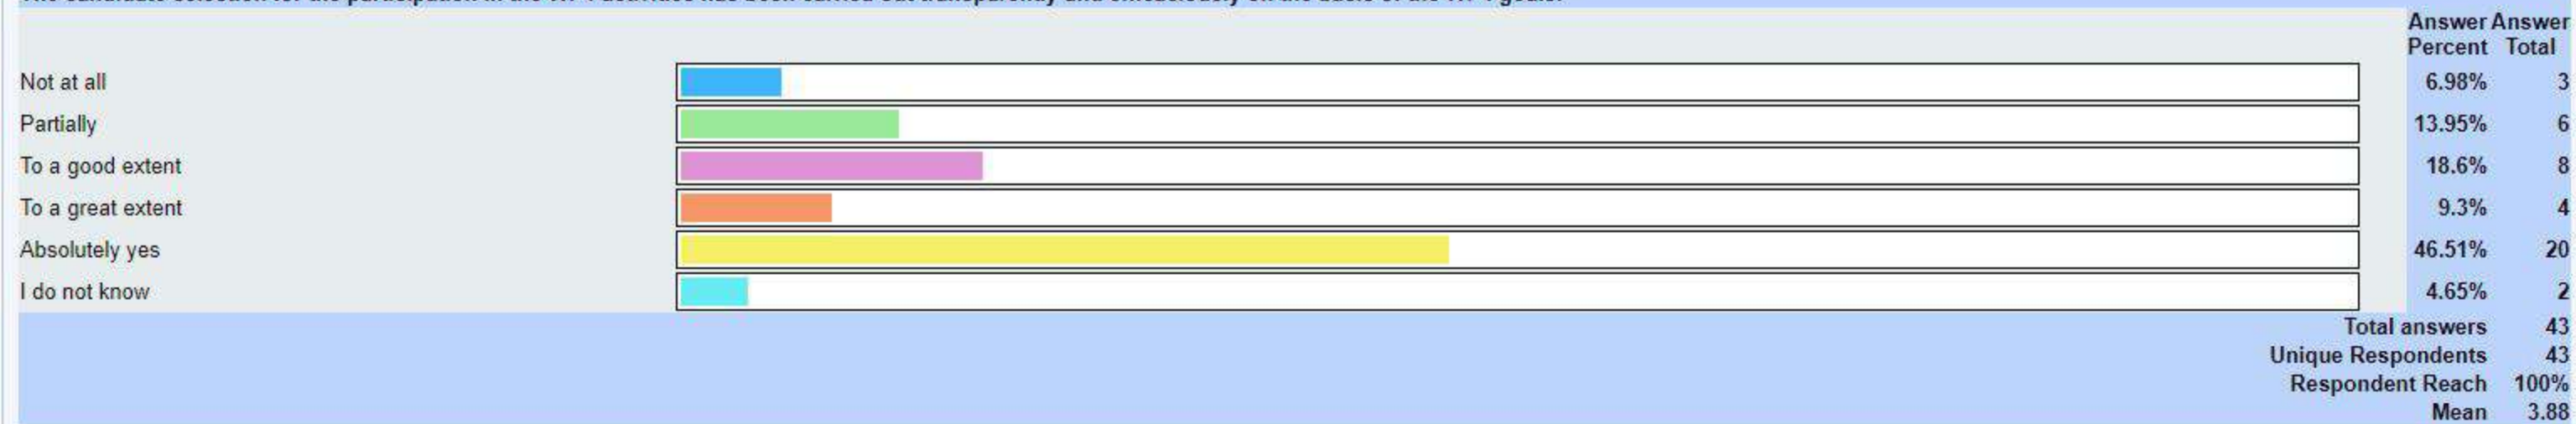

WP4 – DESIGN AND PLANNING OF ACTIVITIES THAT CAN FOSTER STUDENTS ENTREPRENEURSHIPS

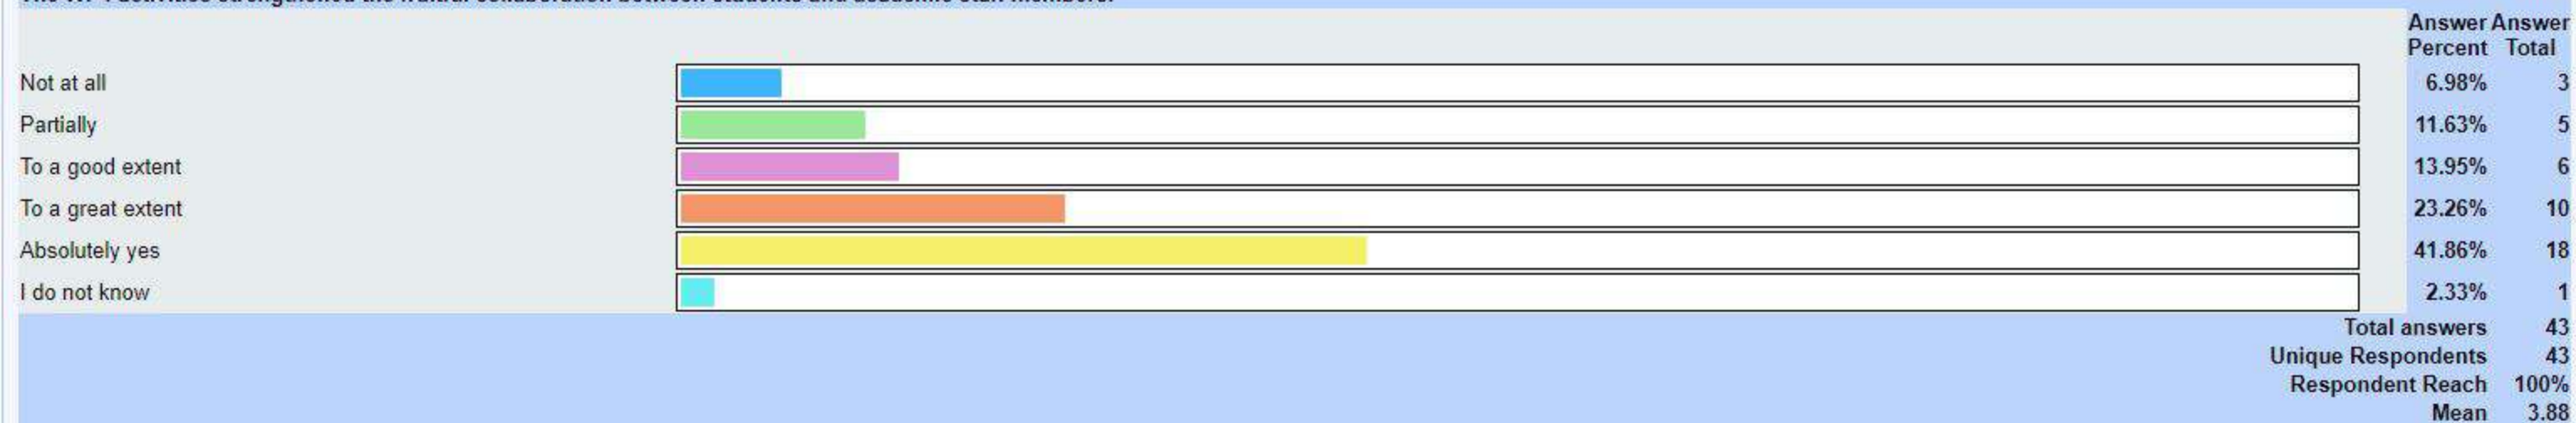

RESULTS OF INTERNAL EVALUATION (STAFF MEMBERS)

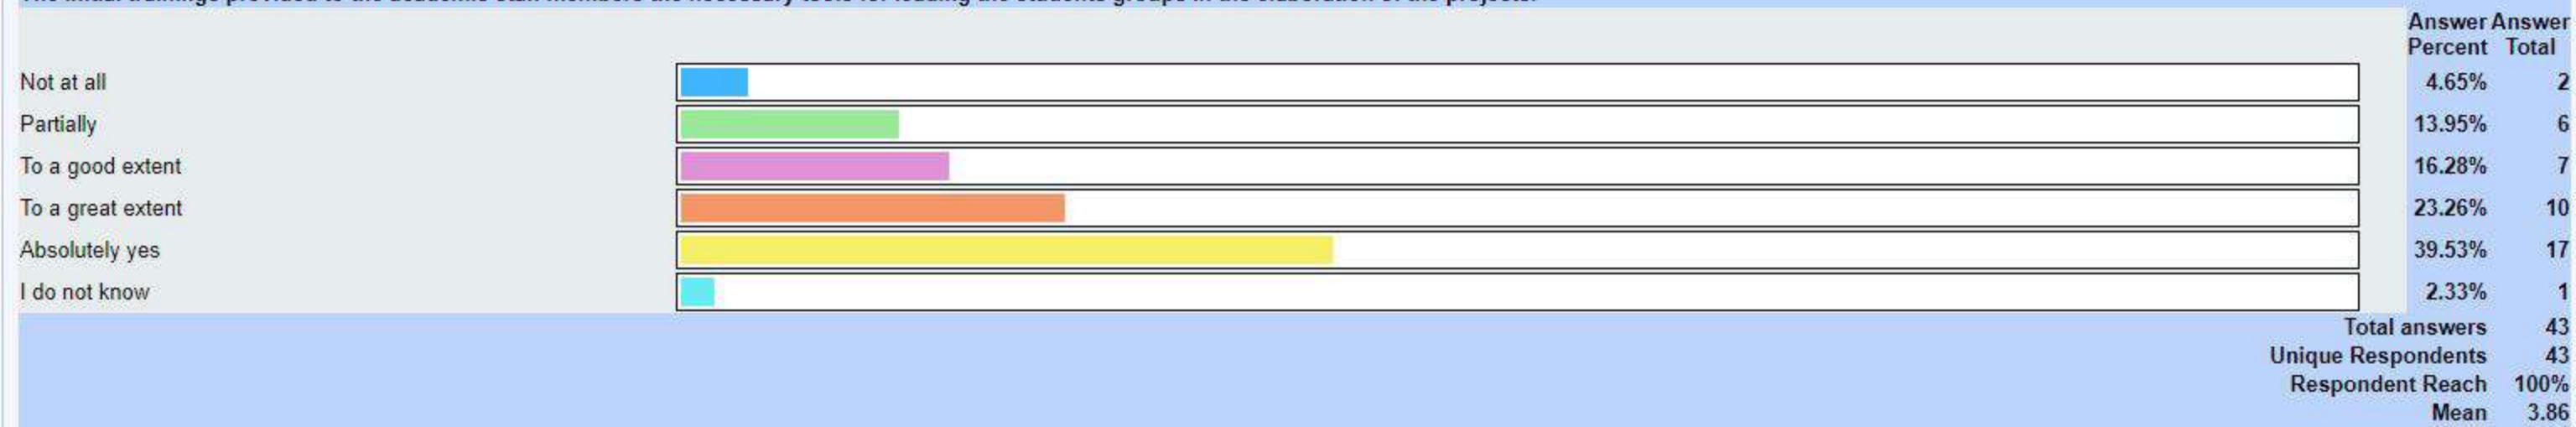

The candidate selection for the participation in the WP4 activities has been carried out transparently and efficaciously on the basis of the WP4 goals.

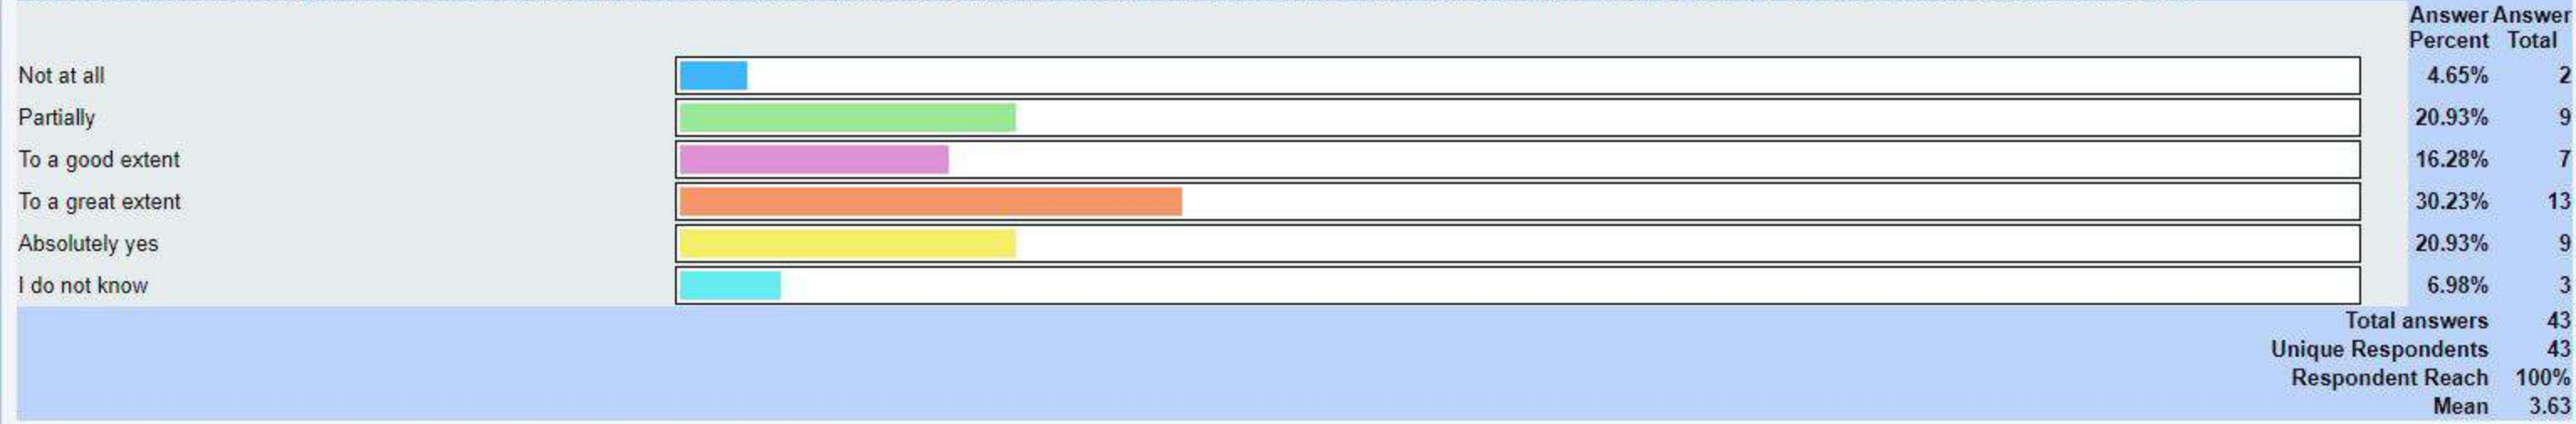

The WP4 activities strengthened the fruitful collaboration between students and academic staff members.

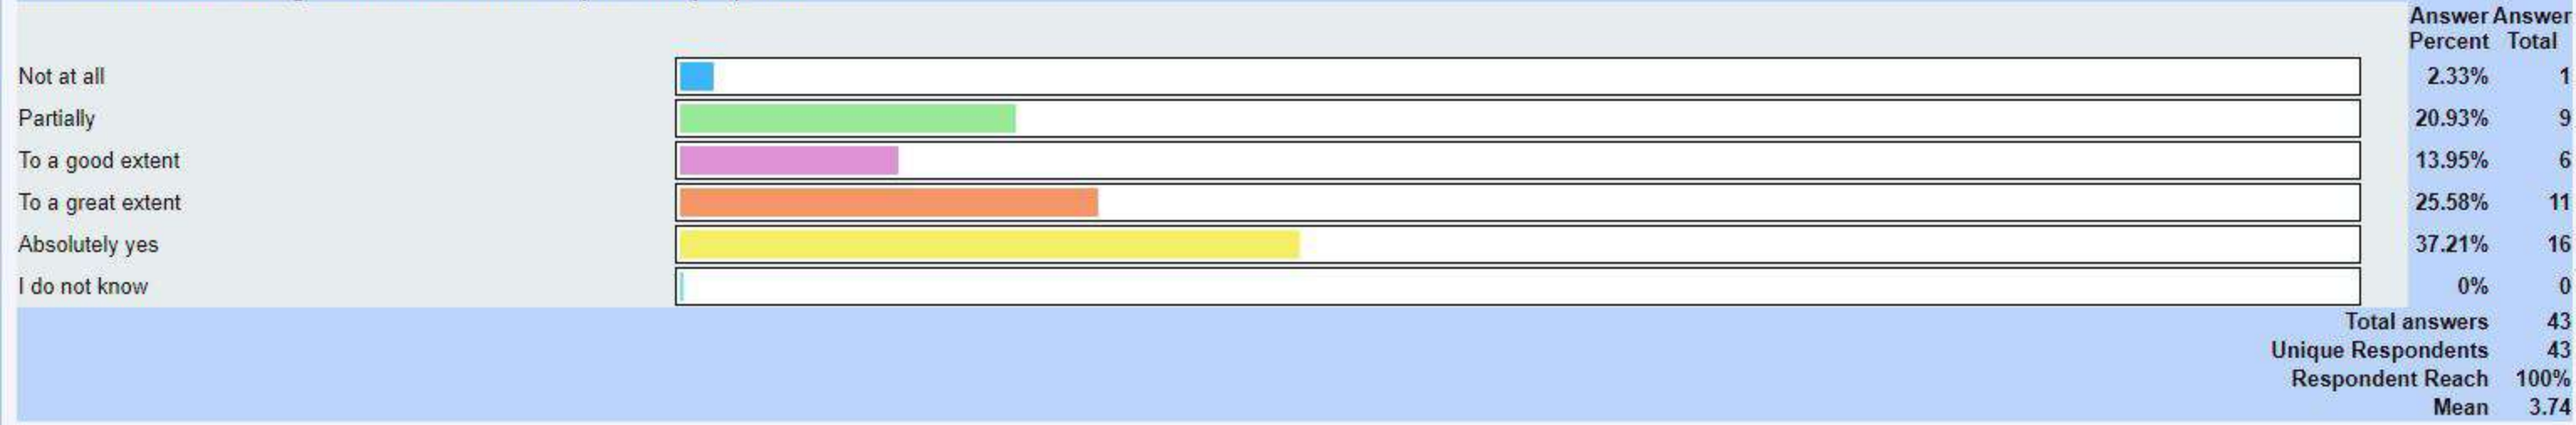

The initial trainings provided to the academic staff members the necessary tools for leading the students groups in the elaboration of the projects.

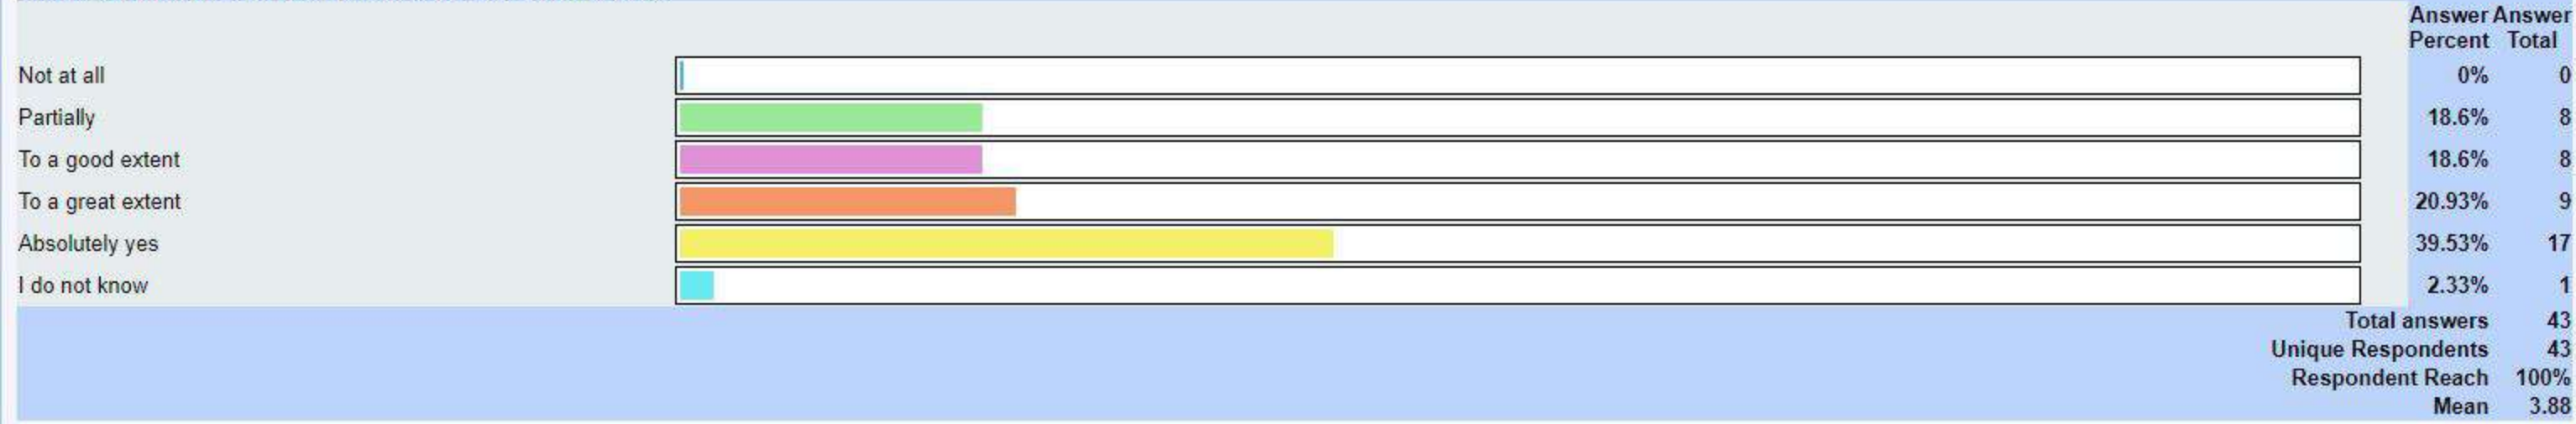

The presentation of start-ups which are currently working in the international cultural sector has been useful for the successive elaboration of entrepreneurial projects by the participants in the WP4 workshops.

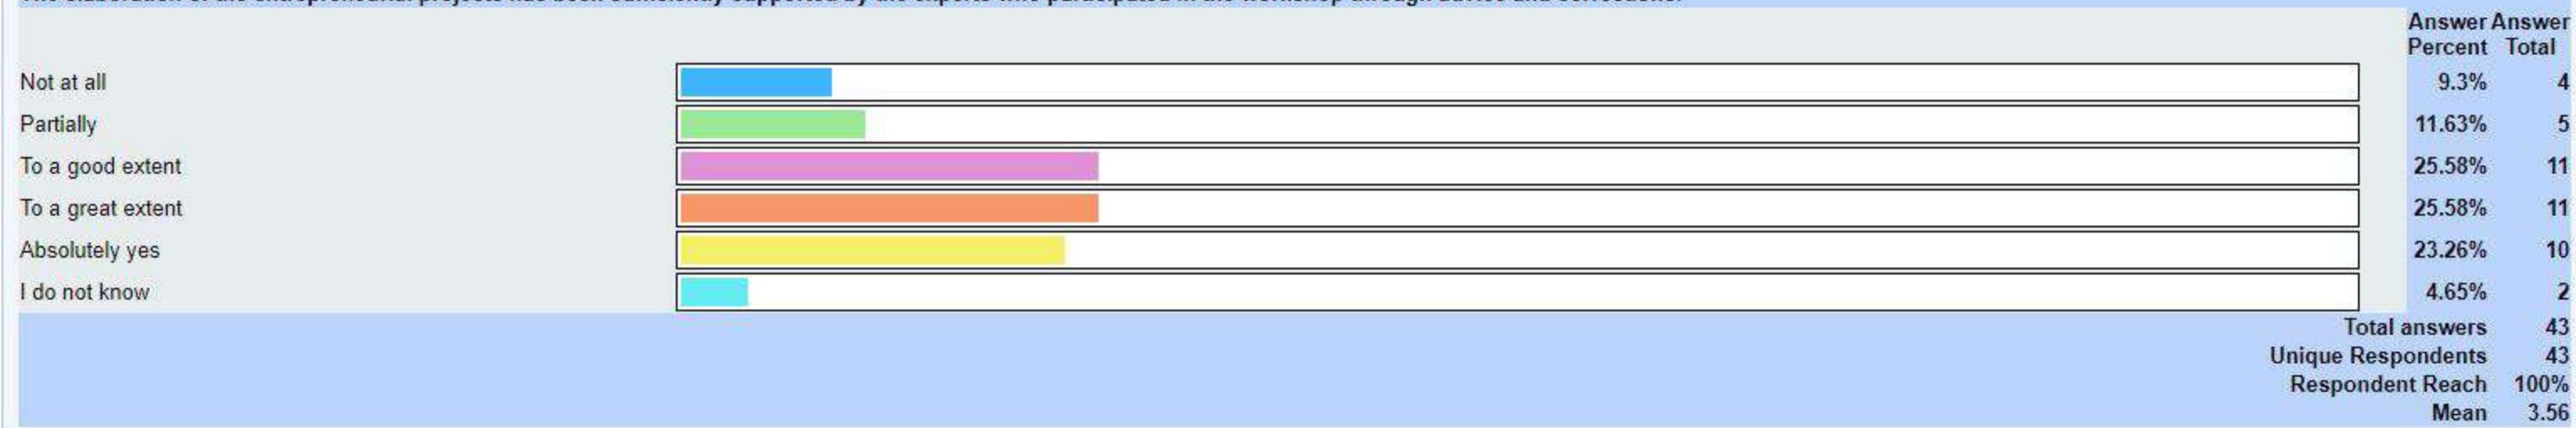

The contents of the trainings activities have been comprehensibly explained.

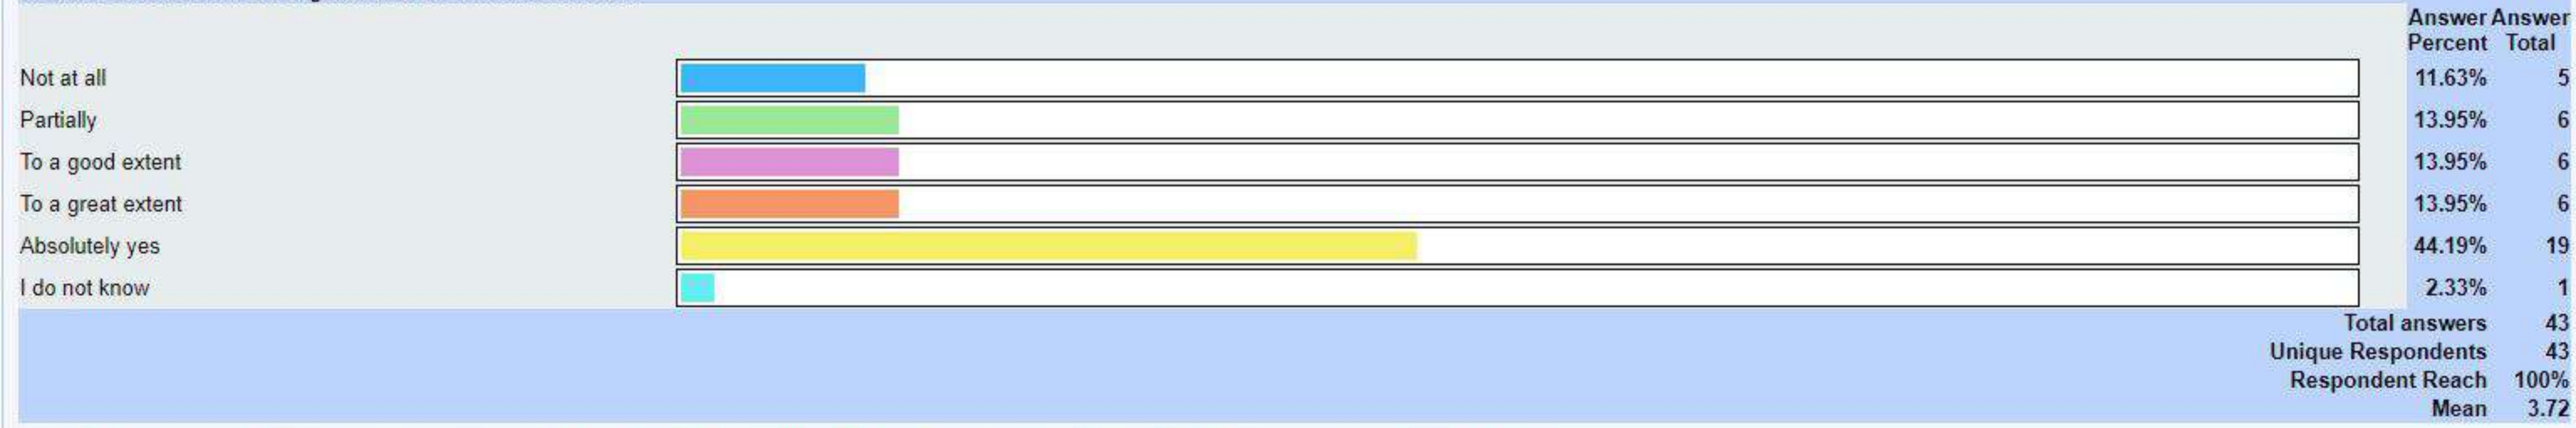

The quality of the presentations during the trainings was good.

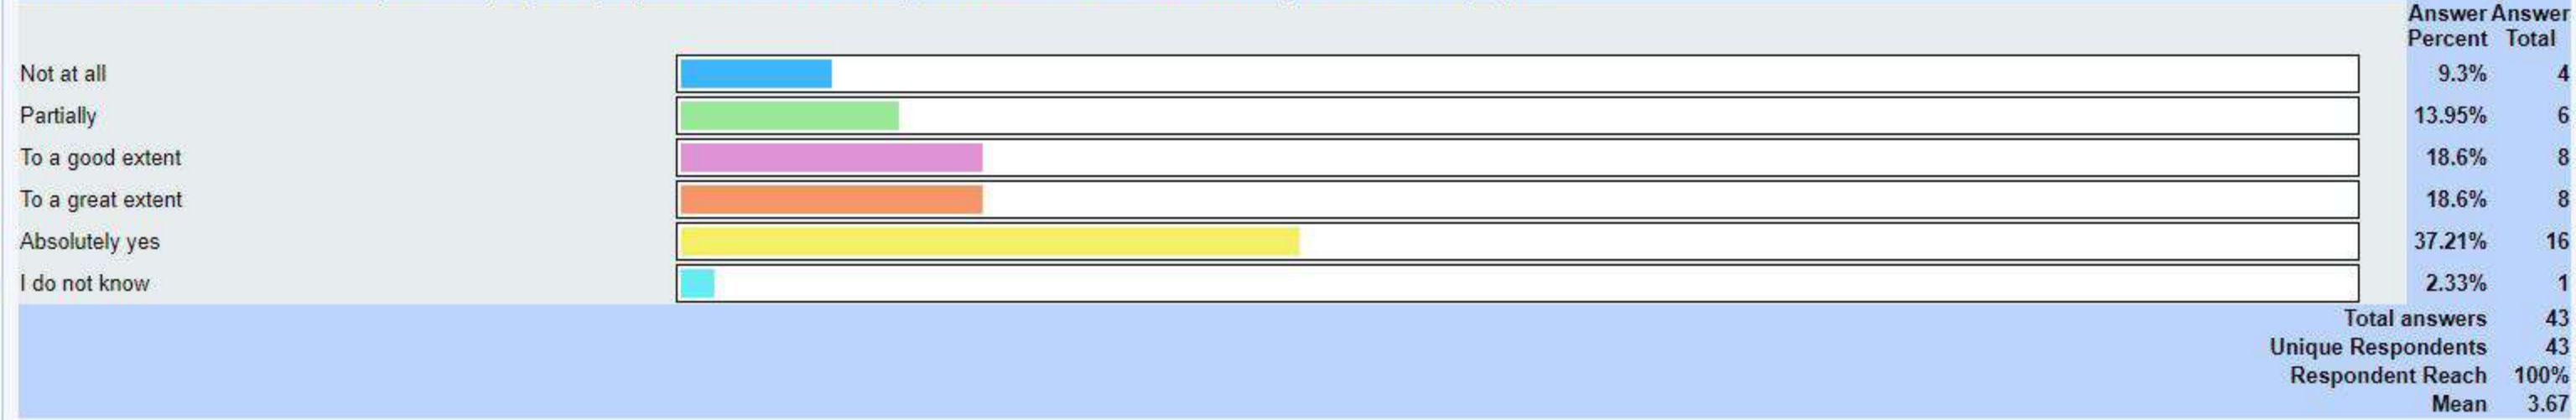

The elaboration of the entrepreneurial projects has been sufficiently supported by the experts who participated in the workshop through advice and corrections.

You are satisfied with the organization of the WP4 activities.

The final assessments of the entrepreneurial projects by experts in the cultural heritage have been useful for the future improvement of the projects.

Other feedback

 شكراً على ماقدمتموه من دعم وإرشاد كبير

 المشروع خاص بالآثاريين وتطوير الكوادر الأثرية من طلبة واستاذة لكن الاسف المشروع في المرحلتين الأولى والثانية لم يسلم بيد المتخصصين ولم يكونوا امامهم صناع القرار لهذا ماالفائدة من هكذا مشاريع

 We believe that the project selection criteria require focusing on the pioneering aspects of the project more than paying attention to other aspects in line with the nature of the Iraqi environment, as well as simulating global experiences in establishing cultural centers that reflect the heritage and archaeological nature of the city.

 The training program was useful, we need other programs with our support to participate in international conferences and international publishing. For example, we need a course on cuneiform script CS6 Thank you again for supporting Iraq and the Iraqi archaeologists and antiquities

 The project submitted by Group C of the University of Mosul was the highest among the Italian experts, with a score of 8.25 out of 10, but the University of Mosul chose Project A which is the lowest rated, with a score of 6.4 out of 10. When the Iraqi universities were given permission to choose the winning project, you eliminated The main objective of the BANUU program.

 Thank you for your efforts during the duration of the project, but I register an objection to the way projects are discussed, as it would have been better for the trainees to discuss projects and not by other parties that have nothing to do with the preparation of projects except that they are senior leaders in universities

 Personally, I benefited a lot from my participation in the WP4 experience and in my interactions with the project team. I hope there will be other phases of the project

28/04/2022

03:13

 Perhaps the benefit would have been greater if the meetings were face to face and not via Internet programs.

00:23

 My participation was limited. Therefore I do not have a holistic appreciation. But I was happy with my lectures and the participatipn of the students.

14:29

 My comment on this program should have been direct lectures and not online. It was easy to communicate with the professors in addition to gaining experience directly. The program was supposed to implement the program in a more practical and interactive way. Difficulty communicating with the program because of the time when it was not appropriate, especially the lectures

06/05/2022

23:18

 It is great to have the wp4 implementation process going straightly and according to plans with ease and success through its designed steps and goals and hard working. Hopefully the students would get the greater benefit of this experience and the project leads to final success. Hind Mohammed Abed University of Baghdad

11/05/2022

 I would like to thank all efforts and support to the project which influenced the academic goal beside developing the required skills for the students and training the lecturers . I recommend strongly to apply for a new project due to support the colleges and graduates on the basis of the local market and business.

11:24

 I think that the program needs to be developed through access to the establishment of cultural centers according to the specificity of the Iraqi regions, especially the city of Mosul, due to its ancient history and cultural heritage.
