BUTRINTO CENTO (1924-2024)

BILANCI E PROSPETTIVE

13-15 November 2024

Department of History and Cultures
San Giovanni in Monte – Aula Prodi, Bologna

In the spring of 1924 Luigi Maria Ugolini completed his first exploratory journey in southern Albania, which would lead him in a few months to the rediscovery of important ancient sites, such as Phoinike, Çuka e Ajtoit and, above all, Butrint. On the occasion of the hundredth anniversary of this event, the conference aims to bring together Italian, Albanian and international archaeological projects for an update on the latest research results in Butrint, Epirus and southern Illyria. At the same time, the conference will be an opportunity to analyze issues and questions concerning the study of material culture in Epirus and Illyria.
