

# Fakespotting Web Learning

The Fakespotting web based learning is an OERs for higher education institutions and adult education in order to deploy and delivery innovative and updated digital information and media literacy resources.

The Output is composed by 6 learning modules

Welcome  
to the  
Fakespotting  
training!

Through its **6 modules**, you will  
learn what disinformation is, how to  
detect it, and tools to fight it.

*Access to information  
is a right, learn how  
to exercise it  
responsibly.*

## Fakespotting Modules

M1: A new Information Space: how the information space changed in the 21st century, main challenges consumers face in information consumption in the 21st century, what does the change in information space mean for quality standard media.

M2: Social vs Regular media: the impact of algorithmic selection of information on information consumption, how to recognise inauthentic behaviour on social media, resources available on how platforms target users with sponsored content.

M3: Types of manipulation: students will be introduced to types of manipulation which are universal for different types of media (including social media) and through different times, as well as to those which use was amplified with new media formats.

M4: Lateral Reading: to enable participants to critically analyze online content using a lateral reading methodology; to provide strategies, tactics and tools for tracing online contents to sources and for evaluating the reliability of those sources

M5: Identification of false contents: This module will introduce students to media manipulation with sources of information. Students will be introduced to important details about media that could be used for recognizing if the media source is relevant or not.

M6: Impacts of disinformation: to shed light on the dissemination dynamics of online content; to increase the awareness about the possible effects of disinformation on real life and society.

## 7 European Editions

Each e-learning module is linked to a set of self-assessment exercises in order to test the knowledge and competences acquired. At the same time users are free to use it as an autonomous tool.

The English e-learning edition has been translated in all the 6 languages represented by the partnership in order to ensure local efficacy and sustainability. Here below the multi-languages links:
