1. Introduction

The following document provides FoodE partners with the visual identity of the project.

It describes:

- Key colors to use;
- The positioning and use of the logo;
- The use of the logo in presentations;
- The typographies partners should use and how to use these;
- Pictures and how to use these;
- Examples of infographics and use of colors and font;
- The use of the EU disclaimer and Grant Agreement number;
- Icons for use in the context of the project.

The different parts of the visual identity and style book are in annex of the present deliverable. Partners have access to the document via the repository system used to share and exchange documents in the project.

One of the major issues of the coming decades is: how will we continue to provide healthy food for a population that continues to grow? FoodE's aim is to conduct scientific research into the question 'What makes an initiative for food supply in cities successful?' Then assess and share that knowledge so that everyone can benefit from it.

POWERPOINT PRESENTATION

A few tips for your PPT-presentation

- **Keep your text short.** Don't put your entire text in the presentation, use short sentences or bulletpoints.
- **Less is more!** Really! Trying to cram too many ideas on one slide can only work to your detriment.
- **One theme per slide.** Whether it's an image, statistic, quote. This will make sure your audience stays focused.
- **Use visuals!** Pictures, icons, infographics, charts. And again, keep it simple!
- **Always remember that your audience is sitting far away.**
So ensure that the font size is large enough to be seen from a distance.
- **Use only two or three colors for your entire presentation.** A primary and some secondary colors.
- **Make sure that there is enough white space throughout your presentation.**
This will give your content room to breathe. Less is definitely more in this case.

- Less is more: use as little text as possible in your PowerPoint
- Be visual: images and graphs are easier to look at than walls of text or tables
- Connect: it's easier for your audience to connect with you than with your slides
- Keep your text short. Don't put your entire text in the presentation, use short sentences or bulletpoints.
