

## ORGANIC FARMING AS A SUSTAINABLE BUSINESS MODEL

ALBINA YASINSKAYA  
Rozino Organic Farm (Bulgaria)

3-4 December 2025, Bologna

This meeting is  
organised by

**Rozino Organic Farm implements  
a regenerative organic farming system where the production  
profile is closely aligned with actual consumption needs.**

This approach increases resource efficiency, reduces environmental impact,  
and builds long-term ecosystem resilience.

**Our main aim is to achieve a negative carbon footprint,  
protect biodiversity, and minimise waste across all stages of  
production.**

Through soil-building practices, carbon-sequestration grazing,  
habitat restoration, and circular resource use,  
we contribute directly to EU climate and nature objective.

LIFE Platform meeting
