

ANALYSIS, PROTECTION AND DEVELOPMENT OF ARCHAEOLOGICAL  
LANDSCAPES IN IRAQ AND UZBEKISTAN THROUGH ICTS  
AND COMMUNITY-BASED APPROACHES

# ARCHAEOLOGICAL LANDSCAPES

WORKSHOP ORGANISED BY THE KALAM PROJECT

Day: November 20<sup>th</sup> 2024

Duration: 9:00 am – 11:00 am

Location: Room 7

Abstract: The approach to the study of archaeological landscapes, put at severe risk by uncontrolled development globally, needs to be enhanced by implementing new practices for their documentation, preservation and management. The combination of new technologies and the full involvement of local communities and heritage stakeholders is a powerful solution, aiming at drafting a shared, detailed plan and thus inspiring different parties to join the protection effort. The goal of this workshop is to investigate the diversity of archaeological landscapes in order to propose effective and sustainable strategies for their data-driven analysis, documentation and management within an inclusive approach, both painting them as a heritage and as a resource.
