## Any suggestion to improve the next module?

“

The content of both presentations on both days were very informative and useful for us. Especially the support given to us during the breakout room sessions to fill the first column of the LFM (we had Mr. Filipp) was extremely helpful to get a clearer idea of the LFM. The content on the second day was a little too much as we were all sitting and following the sessions for almost 5 hours. May be a by adding a third day for the second module would be better to handle the Work Packages as this is one of the most important areas. Towards the end of the presentation on this we were all a bit tired - not because the content was not good, but because it was a long day.

“

A training might also include how to plan and manage budget

“

explain some examples using with actual documents

“

more examples, more good practices models related the project writing proposals or full project writing proposal for grants

“

It will be more effective if more practical cases can be provided.

“

Giving more tips or guidelines and more time to do the assignments because the time is too short and so busy work
